

# Iamdata.Solutions Pty Ltd

Specialising in Infrastructure Asset Management &  
Asset Data Analysis  
For Local Governments

## Quality Assurance Policy

Iamdata Solutions Ltd Pty work closely with a range of clients across Australia, from public sector, private sector, and local governments.

We understand that each client is unique and will have a unique business requirement.

We strive to find the best solutions for our clients by collaborating closely and working together to ensure the expected outcomes are achieved within budget and within specified timeframes.

We strive to find the best solutions for our clients and are committed to providing high quality work for them by following the 8 key Quality Management Principles:

*These eight quality management principles form the basis of the Quality Management System standards within the ISO 9000 family.*
